

Exhibition Hall Stall Directory — AI Test Reference Pack

131 stalls total • 94 named exhibitors • 88 tagged with category/keywords • 37 empty • 5 reserved • 1 booked • 17 categories. Distance = Euclidean on (x, z) plane, y is floor-height and ~constant. Use this as ground truth when QA-testing the stall assistant's facts, distance calcs and navigation.

Categories & Keywords

Category	#	Stall IDs	Sample keywords
Automation & Robotics	8	A2A, A25, A55A, A71, A73, B13, B45, B81	sensors, encoders, timers, temperature controllers, HMI, PLC, counters, ...
Building Materials	10	A26, A27, B25, B31, B35, B39, B61, B65, B67, B95	industrial shutters, rolling shutters, security shutters, fire shutters, high speed doors, entrance doors, rockwool insulation, ...

Edge Cases for QA

Duplicate exhibitors (same company, 2 stalls) — assistant should disambiguate or list both: SAINT GOBAIN (B31, B35); DCODE (B55, B73); MASTER FLOORS (B65, B67); SUZHOU DELI INTELLIGENT LOGISTICS (B57, B59).

Messy / inconsistent names in source data (test fuzzy matching): A25 “MMECHATRONICS INT’L”; A17 “BHARATQCONVEYORS” (likely BHARAT CONVEYORS); A27 “ROXUL ROCKWOO” (likely ROCKWOOL); A79 “ESSAE DIGITRONOCS” vs B75 “ESSAE DIGITRONICS” (different spelling, different stalls); A10 “RESERV” vs A18/A19/A21/A8 “RESERVED”; B23 “INDOSPACE” vs B19 “INDO SPACE”.

Non-exhibitor stalls — 37 EMPTY, 5 RESERVED/RESERV, 1 BOOKED. Assistant should say “no exhibitor / empty / reserved” rather than inventing a company.

Other stress tests: non-existent stall ID (e.g. "A99"); nearest stall in a single-member category (EV & Mobility = MAINI GROUP only); navigation between far corners (A2 ↔ B97); a concept with no exact keyword match (e.g. "drones" → closest is LIBIAO ROBOTICS / AUTHORISE).
